SMART STUDENT ACCESS

CloudSell offers a turnkey Access control & Security solution for Student accommodation, Schools and Universities.

The solution allows students to have full control from the CloudSell Smart Student Access mobile app which allows them to enroll their facial template, invite their visitors, log a facilities ticket, press a panic button or receive bulk communication within their mobile app.

FACIAL VERIFICATION (HOME AFFAIRS)

CloudSell offers verification of identification with our integration link to Home Affairs. This feature allows the system to automatically request your photo from Home Affairs together with your full name to sync your photo to our facial readers for seamless enrolment, the second benefit is for Resident management to verify the information you provided is accurate.

INTEGRATED FACIAL READERS

Our facial readers allows for a single platform for all student, staff and contractors access control together with our visitor management.

Students can enroll by taking a photo on the CloudSell Mobile app , manage their domestics schedule, and the HOA can seamlessly manage contractor schedules allowing them access on specific days if required.

BLUETOOTH ACCESS

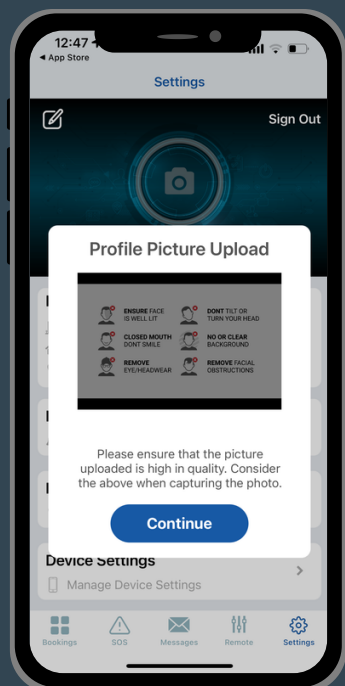

Using a virtual remote via the CloudSell Mobile app (Bluetooth Access) the students and staff are able to trigger any gate, boom or turnstile without the need to open their vehicle window, providing safe and secure access. All transactions are shown on the reporting portal live for management to audit and/or export as a report.

FEATURES

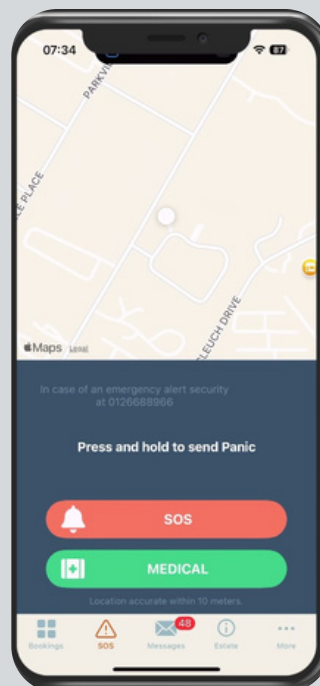

FACIAL ENROLLMENT

The student is able to capture their selfie from the CloudSell mobile app and within 1 minute your facial template syncs too the group of facial readers you have been granted access too.

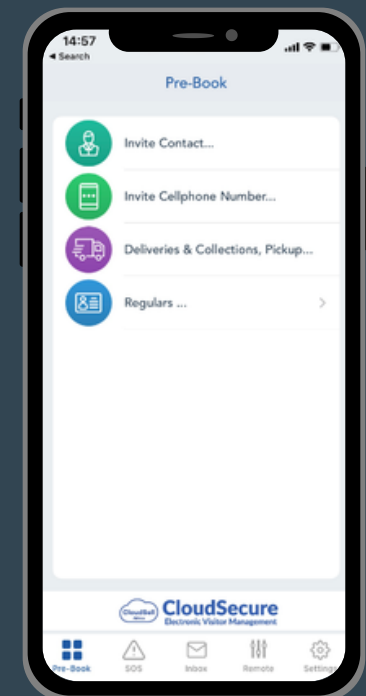

INTEGRATED PANIC BUTTON

In a distress situation the student is able to press a SOS or Medical panic button on the mobile app which immediately notifies the control room and family members of their location and voice recording alert that the student may of indicated when they activated the panic.

INVITE VISITORS

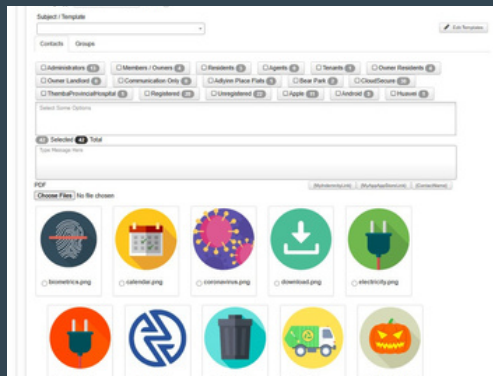

Students are able to invite day visitors or overnight visitors which allows for secure processing & screening of visitors upon arrival.

FEATURES

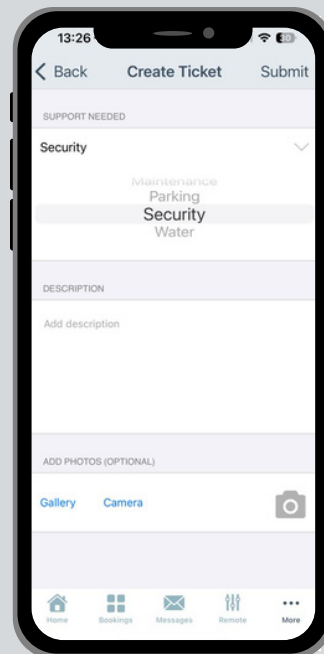

BULK COMMUNICATION

Administrators are able to setup custom groups of students in order to communicate via SMS, email and push notifications into Inbox on the mobile app for instant communication to students.

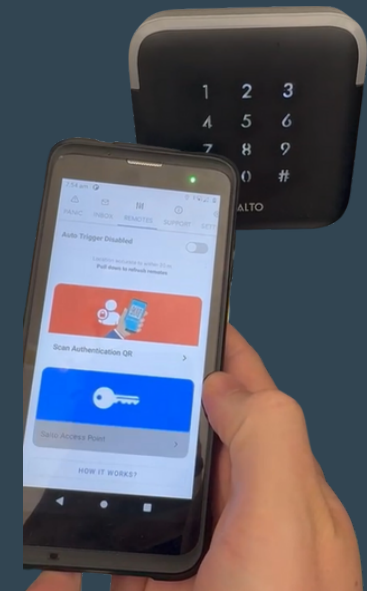

FACILITIES TICKET LOGGING

Students are able to log tickets related to building facilities, security, electricity, or any custom category that is necessary for the institution.

NFC TECHNOLOGY

Most institution's have a master database which can be integrated to auto-provision students into the access control system. Allowing for a centralized management experience. We also integrate to existing access platforms for hybrid deployments such as mobile phone NFC technology.

QUICK SCANNING & SECURE ENTRY PROCESS

Fast & efficient scanning process with option to voice call from the scanner, trigger the boom to open only once all the relevant information is processed

QR CODE INVITATION

Visitors receive a QR code or PIN invitation to their mobile via Whatsapp, email & SMS.
